

Choose the Best Trampoline for Your Family.

AlleyOOP Safety Features

- 1 Patented DoubleBounce™ AirShock Technology – 50% more forgiving + softer landings engineered to reduce the risk of injury with multiple jumpers
- 2 High-Impact Netting – built for longevity
- 3 100% Secure Overlapping Doorway – never left unopened or unzipped, 360° of protection
- 4 Triple-Fail-Safe™ Enclosure – backup net support system
- 5 Foam-cushioned Steel Poles – designed to flex upon impact
- 6 Convenient Rest Zones – kids can safely wait their turns
- 7 Secure Pad Connections – safely absorbs impacts
- 8 Deluxe, Gym-Quality Protective Frame Pad – reinforced 21oz PVC
- 9 The Ultimate Bounce PianoSprings™ – high performance piano wire = maximum bounce & durability + smoother rebound
- 10 PowerBounce™ extra springs for more bounce power and improved shock absorption
- 11 VariableBounce™ Technology – reduces kickback force
- 12 Intrepid, All-Weather Frame – galvanized & powder coated

Springfree Safety Features

- 1 Flexible, composite rods provide a soft, muted bounce
- 2 Rods lay beneath the jumping surface and out of harm's way
- 3 FlexiNet™ enclosure uses overly flexible net rods to cushion jumpers and falls
- 4 SoftEdge™ design reduces likelihood of frame or rod contact

* Springfree manuals instruct users not to bounce intentionally near the edge. The hourglass shape of the Springfree enclosure restricts access to the area near the edge. These factors reduce "usable" space.

- PowerBounce Enhanced Performance = Ability to tune the bounce performance for different age, weight, & skill levels!
- DoubleBounce delivers the best bounce for the widest spectrum of ages and weights
- VariableBounce technology is included on all models. Enjoy a better, safer bounce that reduces stress on the body

ALLEYOOP Tech Specs – 14' Frame Models

Mat Area = 113 sq. ft.;

Useable Play Space* = 133 sq. ft.

*Useable Play Space includes the use of Rest Zones

The Most Usable Space = Room to Spread Out = Better Safety.

Yard Space Required for Safe Clearance – 2 feet around all sides: approx. **254 sq.ft.**

Single User Weight Rating

245 lbs (14' VariableBounce)

270 lbs (14' PowerBounce)

250 lbs (14' DoubleBounce)

300 lbs (14' Power DoubleBounce)

Shipping Weight/System Stability

343 lbs (14' VariableBounce)

379 lbs (14' PowerBounce)

494 lbs (14' DoubleBounce)

552 lbs (14' Power DoubleBounce)

Recommended For –

Lighter weight, younger users to adults and X-game athletes. General bouncing, basic & more advanced maneuvers, games & play.

SpringFree Tech Specs – Large Square (Model S113)

Mat Area = 113 sq. ft.;

Useable Play Space* = 100 sq. ft.

*Useable Play Space is limited by the hourglass shape of the net

Yard Space Required for Safe Clearance – 4 feet from sides - enclosure poles flex out on impact: approx. **347 sq. ft.**

Single User Weight Rating

220 lbs (SF077 Model)

220 lbs (SF092 Model)

220 lbs (SFS113 Model)

Shipping Weight/System Stability

232 lbs *recommend adding sandbags for stability* (SF077 Model)

249 lbs *recommend adding sandbags for stability* (SF092 Model)
